# Index of Subjects

**Arthritis,** an 18 year clinical review of septic, from tropical Australia, 423
**Astrovirus,** seroprevalence of, types 1 and 6 in London, determined using recombinant virus antigen, 159

***Borrelia burgdorferi,*** detection of four species of, sensu lato in *Ixodes ricinus* ticks collected from roe deer (*Capreolus capreolus*) in the Netherlands, 563
**Brucella,** seroprevalence of, antibodies among persons in high-risk occupation in Lebanon, 281

**Campylobacter,** a milk-borne, outbreak following an educational farm visit, 457
**Campylobacter,** epidemiological study on risk factors and risk reducing measures for, infections in Dutch broiler flocks, 245
***Campylobacter,*** experimental studies on the infectivity of non-culturable forms of, spp. in chicks and mice, 463
***Campylobacter jejuni,*** increased colonization potential of, strain 81116 after passage through chickens and its implication on the rate of transmission within flocks, 213
***Campylobacter jejuni,*** the application of genotyping techniques in the epidemiological analysis of, 233
***Chlamydia pneumoniae,*** association of, IgA antibodies with recently symptomatic asthma, 513
**Cholera,** resurgence of, in Hong Kong, 44
***Clavibacter toxicus,*** genetic analysis of, the agent of annual ryegrass toxicity, 393
***Clostridium perfringens,*** foal diarrhoea between 1991 and 1994 in the United Kingdom associated with, rotavirus, *Strongyloides westeri* and *Cryptosporidium* spp., 375
**Cryptosporidiosis** in Wisconsin: A case-controlled study of post-outbreak transmission, 297
**Cryptosporidiosis,** severe giardiasis and, in Scotland, UK, 551
***Cryptosporidium,*** foal diarrhoea between 1991 and 1994 in the United Kingdom associated with *Clostridium perfringens*, rotavirus, *Strongyloides westeri* and, spp., 375
***Cyclospora cayetanensis,*** the incidence of, in stool samples submitted to a district general hospital, 189

**Echovirus,** viral meningitis due to, types 6 and 9: epidemiological data from Western Australia, 507
**Enterovirus,** outbreak of vertigo in Wyoming: possible role of an, infection, 149
**Epidemics,** preventing, in a community of households, 443
**Equine influenza viruses,** antigenic and genetic analysis of, from tropical Africa in 1991, 367
***Escherichia coli,*** enteroaggregative, associated with an outbreak of diarrhoea in a neonatal nursery ward, 11
***Escherichia coli,*** prevalence and characteristics of, serotype O157:H7 and other verotoxin-producing *E. coli* in healthy cattle, 251
***Escherichia coli,*** vero cytotoxin-producing, particularly serogroup O157, associated with human infections in England and Wales: 1992–4, 1

**Filariasis,** past exposure and the dynamics of lymphatic, infection in young children, 195
**Foodborne infection,** problems in the diagnosis of, in general practice, 479
**Foot-and-mouth disease virus,** isotype-specific antibody responses to, in sera and secretions of 'carrier' and 'non-carrier' cattle, 349

**Giardiasis,** severe, and cryptosporidiosis in Scotland, UK, 551

**Hantavirus,** evidence of, in wild rodents in Northern Ireland, 361
**Hepatitis A,** an outbreak of, associated with a bakery, New York, 1994: The 1968 'West Branch, Michigan' outbreak repeated, 333
**Hepatitis A,** are homosexual males a risk group for, infection in intermediate endemicity areas? 145
**Hepatitis B,** ante-natal screening for, surface antigen: an appraisal of its value in a low prevalence area, 121
**Hepatitis B,** the occurrence of, and hepatitis C viruses in Pakistani patients with chronic liver disease and hepatocellular carcinoma, 327
**Hepatitis B virus,** epidemiological patterns of, (HBV) in highly endemic areas, 313
**Hepatitis B virus** infection in general population in Madagascar: evidence for different epidemiological patterns in urban and in rural areas, 133
**Hepatitis C,** the occurrence of hepatitis B and, in Pakistani patients with chronic liver disease and hepatocellular carcinoma, 327
**Hepatitis C virus,** genotyping of, isolates from Basque Country, Spain, 533
**HIV-1,** impact of incomplete coverage of neonatal dried blood spot screening on estimating, seroprevalence, 173
**HIV,** microbiology of, associated bacteraemia and diarrhoea in adults from Nairobi, Kenya, 139
**HIV-1,** seroepidemiology of HTLV-I in relation to that of, in the Gauteng region, South Africa, using dried blood spots, 343
**HIV,** the UK Register of, Seroconverters: methods and analytical issues, 305
**HTLV-I,** seroepidemiology of, in relation to that of HIV-1 in the Guateng region, South Africa, using dried blood spots on filter papers, 343

**Influenza viruses,** an epidemiological study of, among Chinese farm families with household ducks and pigs, 179

***Legionellaceae*, distribution of *mip*-related sequences in 39 species (48 serogroups) of, 501**
***Listeria monocytogenes*, a foodborne outbreak of gastroenteritis involving, 429**
***Listeria*, occurrence of, species in prepacked retail sandwiches, 89**
***Listeria* species in domestic environments, 437**

**Measles, a study of maternally derived, antibody in infants born to naturally infected and vaccinated women, 519**
**Measles, nutritional status and delayed mortality following early exposure to, 525**
**Meningococcal, antibiotic prescribing during an outbreak of, disease, 103**
**Meningococcal, respiratory syncytial virus infection and, disease, 107**
***Myobacterium chelonae*, iatrogenic outbreak of, skin abscesses, 113**

***Neisseria meningitidis*, risk factors for, carriage in a school during a community outbreak of meningococcal infection, 259**
**Neonatal diarrhoea, role of enteric pathogens in the aetiology of, in lambs and goat kids in Spain, 203**

**Parvovirus B19, human, infection within a family and risk for pregnant women, 401**
**Pneumococcal meningitis in the North East Thames Region UK: epidemiology and molecular analysis of isolates, 95**
**Pneumococci, incidence of invasive pneumococcal disease and distribution of capsular types of, in Denmark, 1989–94, 411**

**Respiratory syncytial virus infection and meningococcal disease, 107**
**Rotavirus, foal diarrhoea between 1991 and 1994 in the United Kingdom associated with *Clostridium perfringens*, *Strongyloides westeri* and *Cryptosporidium* spp., 375**

***Salmonella*, distribution, gene sequence and expression *in vivo* of the plasmid encoded fimbrial antigen of, serotype Enteritidis, 18**
***Salmonella enteritidis*, a novel relationship between O-antigen variation, matrix formation, and invasiveness of, 219**
***Salmonella enterica*, isolates of, Enteritidis PT4 with enhanced heat and acid tolerance are more virulent in mice and more invasive in chickens, 79**
***Salmonella enterica*, World Health Organisation – supervised interlaboratory comparison of ELISAs for the serological detection of, serotype Enteritidis in chickens, 69**
***Salmonella enteritidis*, recurrent outbreaks of, infections in a Texas restaurant: phage type 4 arrives in the United States, 30**
***Salmonella virchow* PT 26 infection in England and Wales: a case control study investigating an increase in cases during 1994, 36**
**Scarlet fever, the dynamics of, epidemics in England and Wales in the 19th century, 493**
**Schistosomiasis, the consequences of uncertainty for the prediction of the effects of, control programmes, 537**
***Staphylococcus aureus*, genomic diversity of *mec* regulator genes in methicillin-resistant, and *Staphylococcus epidermidis*, 289**
***Staphylococcus epidermidis*, genomic diversity of *mec* regulator genes in methicillin-resistant *Staphylococcus aureus* and, 289**
***Staphylococcus epidermidis*, virulence of, in a mouse model: significance of extracellular slime, 267**
**Streptococci, epidemiological aspects of group B, of bovine and human origin, 417**
***Strongyloides westeri*, Foal diarrhoea between 1991 and 1994 in the United Kingdom associated with *Clostridium perfringens*, rotavirus, and *Cryptosporidium* spp., 375**

**Tuberculosis, outbreak in a Texas prison, 1994**

**Varicella-zoster virus, an analysis of infection control of, infections in Addenbrooke's Hospital Cambridge over a 5-year period, 1987–92**
***Vibrio anguillarum*, plasmid profiles, restriction fragment length polymorphisms and O-serotypes among, isolates, 471**
***Vibrio cholerae*, comparison of pulsed-field gel electrophoresis and ribotyping for subtyping of, O139 isolated in Thailand, 52**
***Vibrio ordalii*, restriction fragment length polymorphism of the pMJ101-like plasmid and ribotyping in the fish pathogen, 385**

***Yersinia enterocolitica*, detection of pathogenic, using the multiplex polymerase chain reaction, 59**
